

inBridge

ZKBioSecurity management software conveniently pre-loaded in a secured box

inBridge drastically reduces ZKAccess software installation time by eliminating software downloads.

InBridge provides both added security and convenience when installing ZKAccess management software. InBridge is a single-purpose management appliance which comes pre-installed with ZKBioSecurity software. Simply power on and access the inBridge appliance via a web browser, configure the inBridge network settings, and start adding doors. ZKBioSecurity has modules for access control video surveillance and lift control. Using InBridge ensures installers no longer risk being challenged by the customer's firewall or poor Internet connections when downloading software. And since InBridge is a single-purpose appliance, installers can be assured no latency issues can arise due to conflicting 3rd party applications.

Key Features:

CPU

N3050 Intel Celeron Processor

Memory:

4 G RAM

Storage:

120G SSD

Connectors And WLAN:

10/100/1000 Mbps Ethernet, 802.11ac wireless

IP address configuration 192.168.1.18

Bluetooth 4

4 x USB 3.0, 2x USB 2.0, Infrared sensor

Power Supply:

19V, 65W wall-mount AC-DC power adapter

Dimensions:

115mm x 111mm x 52mm, VESA mount bracket
